

Fedde Scheele

Gynecologist in the OLVG Hospital since 1997. Professor in 'Health Systems Innovation and Education' at VU University, Amsterdam, the Netherlands. Since 2004 at the VUmc Medical Centre (School of Medical Sciences) and since 2013 at the department of Science (Athena Institute for Transdisciplinary Research). Dean of the OLVG teaching hospital. Since 2018 member of the supervisory board of the health insurance company Menzis.

Research: I have shifted my focus from biomedical research to research on paradigm changes in health care and societal accountability of medical education programs.

Curriculum design: I was both at National and European level project leader of the curriculum design for post graduate training in obstetrics and gynecology. I was advisor in curriculum design in several other medical disciplines.

Teaching: Besides the daily clinical bedside teaching I have (co) designed workshops about: teaching, assessment, portfolio, EPA's, CBME, curriculum design, change management, negotiation, leadership, team skills and holistic approach of vulnerable patients.

Specialties

Obstetrics and Gynecology

Post graduate training practice and research in medical education

Curriculum design, implementation and evaluation, accreditation and licensing (all based on) Health systems innovation
