

Wouter Froyman

Wouter Froyman graduated as a Medical Doctor at KU Leuven in 2011. He finished his specialization in Obstetrics and Gynecology in 2018 and has since then worked as a consultant in this department at the University Hospitals Leuven.

His main clinical activities and research are related to gynecological ultrasound and treatment of benign gynecological pathology, with special interest in minimally invasive and robot-assisted surgery.

In 2019, he obtained his PhD degree in Biomedical Sciences, with a doctoral thesis entitled "Progress in differentiation and clinical management of adnexal masses". In 2020, he was appointed associate professor at KU Leuven. He is also a steering committee member of the International Ovarian Tumor Analysis (IOTA) studies.
